

Poster Presentations

POSTERS	Title	Authors
<u>102</u>	Surface Charging Considerations for Composite Materials used in Spacecraft Application	Lombardi, Robert; Likar, Justin; Bogorad, Alexander; Herschitz, Roman
<u>103</u>	Solar Array Operation in HCT Plume: Electrostatic Discharge Generated Plasma Expansion Velocity Measurements	Justin J. Likar, Yevgeny Raitses, Kevin August, Abraham Chien, Dale Ferguson, Boris Vayner, Ryan Hoffmann, Adrian Wheelock, John Prebola, Dustin Crider, Michael Bodeau, Sigrid Close, Ashish Goel, Todd Schneider, Jason Vaughn, Bao Hoang, Kenneth Steele, Nikki Noushkam, Jason Young, and Martin Griswold
<u>113</u>	Density of State Models and Temperature Dependence of Radiation Induced Conductivity	Jodie C. Gillespie, JR Dennison, and Alec M. Sim
<u>115</u>	Energy Harvesting Cell of Reduced Graphene Oxide for Space Structure	Jongpil Kim, Chunghwan Jeon, Hyunseop Lee, and Daeweon Kim
<u>125</u>	The Dynamic Interplay Between Spacecraft Charging, Space Environment Interactions and Evolving Materials	JR Dennison
<u>131</u>	DICTAT Validation	D. Rodgers and F. Lei
<u>133</u>	Impacts of Solar Storm Events and Ion Beam Emission on Electrostatic Tractor Performance	Erik A Hogan and Hanspeter Schaub
<u>139</u>	Arcing test on an aged grouted solar cell coupon with a realistic flashover simulator	Jean-Michel Siguier, Virginie Inguibert, Gaël Murat, Denis Payan, Nicolas Balcon
<u>141</u>	Charging Properties of Space Used Dielectric Materials	Thierry Paulmier, Bernard Dirassen, Mohamed Belhaj, and David Rodgers
<u>142</u>	Experimental test facilities for representative characterization of space used materials	Thierry Paulmier, Bernard Dirassen, Mohamed Belhaj, Virginie Inguibert, Denis Payan, Nicolas Balcon
<u>144</u>	Defect Density of States Model of Cathodoluminescent Intensity and Spectra of Disordered SiO ₂	Amberly Evans Jensen and JR Dennison
<u>147</u>	GEO spacecraft worst-case charging estimation by numerical simulation	J.-C. Matéo-Vélez, C. Pignal, N. Balcon, D. Payan, P. Sarrailh, and S. Hess

Poster Presentations

POSTERS	Title	Authors
<u>149</u>	Correlation of ISS Electric Potential Variations with Mission Operations	Emily M. Willis, Joseph I. Minow, and Linda Neergaard Parker
<u>151</u>	Analysis of charging kinetics on space dielectrics under representative worst case geostationary conditions	Thierry Paulmier, Angélica Sicard-Piet, Didier Lazaro, Denis Payan, and Nicolas Balcon
<u>158</u>	The Pulsed Langmuir Probe Technique to Mitigate Contamination Effects on Small Spacecraft	Jesse McTernan, Tim Brubaker, Sven Bilén
<u>159</u>	Automated Charging Event Identification Algorithm for LEO Spacecraft Update -- 2014	R. L. Bishop, J. L. Roeder, J. F. Fennell, and P. C. Anderson
<u>162</u>	Analytic Models for Space Charge Limiting of Photoemission and Secondary Electron Emission in near-Sun Environments	M. J. Mandell, V. A. Davis, and M.M. Donegan
<u>172</u>	Effect of material properties on spacecraft charging simulation	Kazuhiro Toyoda
<u>175</u>	Flashover discharge measurement with uniform surface charging and modeling of current waveform	Kazuhiro Toyoda, Satoshi Miyazaki, and Mengu Cho
<u>178</u>	Measurements of Intrinsic Electron Emission Yields of High Resistivity Ceramic Materials	Justin Dekany, JR Dennison, Ender Savrun, Ryan Hoffmann, and Clint Thomson
<u>179</u>	Variations in Cathodoluminescent Intensity of Spacecraft Materials Exposed to Energetic Electron Bombardment	Justin Dekany, Justin Christensen, JR Dennison, Amberly Evans Jensen, Gregory Wilson, Todd Schneider, Charles W. Bowers and Robert Meloy
<u>182</u>	A New Study in Electron Trap Modification as a Result of Insulating Materials Exposure to Space Weather	Ryan Hoffmann, Alec Sim, David Wilt, Dale Ferguson, and James Patton
<u>186</u>	High Current ESD Test of Advanced Triple Junction Solar Array Coupon	Kenneth H. Wright, Jr., Todd A. Schneider, Jason A. Vaughn, Bao Hoang, Frankie Wong

Poster Presentations

POSTERS	Title	Authors
<u>189</u>	Optimization of SEE yield physical model	Hiromu Nagato, Hiroaki Taniguchi, Hiroaki Miyake, Yasuhiro Tanaka, Masamichi Ohira, Teppei Okumura, Shiro Kawakita, and Masato Takahashi
<u>190</u>	The photoelectron emission current measurement of the spacecraft insulating material which was done Electron beam irradiation	K. Yabe, K. Nomura, H. Miyake, Y. Tanaka, M. Ohira, T. Okumura, S. Kawakita, and M. Takahashi
<u>195</u>	Numerical simulation of satellite charging control for propellantless orbital control	Kento Hoshi, Takanobu Muranaka, Hirotsugu Kojima, Hiroshi Yamakawa, Hideyuki Usui, and Iku Shinohara
<u>199</u>	Immersed-Finite-Element Particle-in-Cell Simulations of Lunar Surface Charging	D. Depew, D. Han, J. Wang, X. He, and T. Lin
<u>200</u>	Electron Emission Properties of Space Used Dielectric Materials	M. Belhaj, T. Paulmier, and D. Rodgers
<u>201</u>	Influence of the Injected Charge Polarity on the Electrical Behavior of CMX-100-AR Cover Glass Submitted to Electron Irradiation	M. Belhaj, Th. Paulmier, N. Guibert, D. Payan, and N. Balcon
<u>203</u>	Xe erosion effect on the electron emission yield of coverglass	M. Belhaj, J.-C. Matéo-Vélez, V. Inguibert, D. Payan, N. Balcon
<u>204</u>	Behavior of arc current waveform on satellite solar panels and its dependence on arc location, dissipated charge and irradiation time	Rashmi S. Joshi and Suryakant B. Gupta
<u>208</u>	Extension of SPIS to simulate dust electrostatic charging, transport and contamination of lunar probes	P. Sarrailh, J.-C. Matéo-Vélez, S. Hess, F. Cipriani, D. Rodgers, A. Hilgers, B. Jeanty-Ruard, B. Thiébault, J. Forest, F. Honary, S. Marple
<u>210</u>	Measurement of the magnetic field and the shape effect on the plasma collection by a positive biased tether	P. Sarrailh, J.-M. Siguier, G. Murat, V. Inguibert, J.-F. Roussel
<u>211</u>	Surface Potential Characteristics of Electron Irradiated Cover Glass for Spacecraft Solar Cell	Rikio Watanabe, Naoki Higashiyama, Keita Kawano, Hiroaki Miyake, Masamichi Ohira, Teppei Okumura, and M. Takahashi

Poster Presentations

POSTERS	Title	Authors
<u>212</u>	Relationship between internal charging and particle fluxes in the outer radiation belt	Junhyun Lee, Ensang Lee, Jongho Seon, Khan-Hyuk Kim, and Jaejin Lee
<u>214</u>	Analysis of charging of the spacecraft developed by NPO Lavochkin using electrophysical modeling and the in-situ measurements	E.V. Nikolskiy, A.V. Pakostina, A.E. Bakutov, L.S. Novikov, A.A. Makletsov, V.V. Sinolits
<u>216</u>	Evaluation of Secondary Electron Emission Yields and Volume Resistivities of Polymer Films Due to Continuous Low Energy Electron Beam Irradiation	Haruhisa Fujii, Masamichi Oohira, and Teppei Okumura
<u>217</u>	Charging Characteristics of Cover Glass on Solar Cell Due to Electron Beam Irradiation	Haruhisa Fujii, Naonori Miyamoto, Masamichi Oohira, Teppei Okumura, and Shirou Kawakita
<u>218</u>	Discharge Properties of ETFE Wires for Spacecraft Use	Haruhisa Fujii, Saki Kurata, Kouhei Takeyama, and Takashi Nakaoka
<u>221</u>	Determination of energy and charge deposition profiles in elemental slabs from an isotropically equivalent electron source using Monte Carlo simulations.	David A. Barton, Brian P. Beecken, and Robert M. Hoglund
<u>223</u>	Creation and development of a next generation NUMIT-type model that handles changing conductivities and varying electrode configurations	Brian P. Beecken, Thomas R. Greenlee, and Robert M. Hoglund
<u>224</u>	The Space Weather Broadcast from the Van Allen Probes: A Resource for the Community	R. Barnes, B. Mauk, M. Weiss, G. Romeo, L. Zanetti, M.Kessel, and D. Baker
<u>226</u>	Current to Positive Probes in Magnetized Drifting Plasma	J. R. Heinrich and D. L. Cooke
<u>227</u>	Nascap Simulation of Freja Satellite Charging	David L. Cooke, Christopher J. Roth, Victoria A. Davis, and Myron Mandell
<u>229</u>	Application of Electrostatic Tethers for Scattering of Relativistic Particles in the Earth's Radiation Belts	Antonio Sanchez-Torres

Poster Presentations

POSTERS	Title	Authors
230	Development of a miniature oscilloscope and current probe for measurement of Arc current on-board HORYU-3 in Low Earth Orbit	H.Fukuda, T.Shimizu, K.Toyoda, M.Cho
231	On-Orbit Test on Solar Cell Coupon with Commercial-Off-the-Shelf Semi-Conductive Coating and Thermal Cycling Test on Improved Coating	Akitoshi Takahashi, Minoru Iwata, Mengu Cho, and Ryo Muraguchi
232	Flight Arcing Experiment by Primary arc effects Solar Cell At Leo (PASCAL) On-board International Space Station	Shunsuke Iwai, Justin. J. Likar, Teppei Okumura, Hiroshi Fukuda, Kazuhiro Toyoda, and Mengu Cho
234	Electron Emission Yield Measurement of Polyimide	Akira Miyahra, Wu Jiang, Arifur R. Khan, Kazuhiro Toyoda, and Mengu Cho
235	Development of a Triggerless Vacuum Arc Thruster by Using a CFRP Propellant	Shingo Fuchikami, Kateryna Aheieva, Tatsuo Shimizu, Kazuhiro Toyoda, and Mengu Cho
236	A Statistical Analysis of the Worst GEO Plasma Environment	Masao Nakamura and Asato Yoneda
240	Test results of a spherical Langmuir probe with retarding grids	A. Hilgers, D. El Boudali, C. Hanberg, A. Lidkte, G. D. Schmidtke, R. Brunner, W. Konz, W. Pfeffer, J.-P. Lebreton, D. Rodgers, F. Cipriani, and G. Drolshagen
241	Investigation of Spacecraft Plasma Interactions on Mercury Mission Orbiter	D. Fontaine, D. Delcourt, and Alain Hilgers,
242	Electromagnetic Full-Particle Simulations on Spacecraft Interaction with Near-Sun Plasma Environment	Y. Miyake and H. Usui
243	The Situational Awareness Sensor Suite for the ISS (SASSI) Mission Concept: Investigating ISS Charging and Wake Effects	Habash Krause, J. I. Minow, V. N. Coffey, B. E. Gilchrist, and W. R. Hoegy

Poster Presentations

POSTERS	Title	Authors
<u>247</u>	Charging Analysis of HAYABUSA Spacecraft to Evaluate the Spacecraft Contamination due to Lack of Neutralization on Ion Thrusters	Takanobu Muranaka, Satoshi Hosoda, and Kazutaka Nishiyama
<u>251</u>	The characters of small space debris impact inducing discharge	Hongwei Li, Jianwei Han, Minghui Cai, Zhenlong Zhang, Fengshi Wu
<u>255</u>	Effect of Space Coverglass Degradation on GEO Spacecraft Charging	Dale C. Ferguson
<u>256</u>	Safeguarding Satellites from Space Weather: NOAA Satellite Anomaly Tools and Services	R. J. Redmon, J. V. Rodriguez, W. F. Denig, P. Loto'aniu, T. Onsager, and J. C. Green
